

MISSION

RESEARCH AND DEVELOPMENT OF IMMUNOTHERAPIES AND DIAGNOSTIC METHODS AGAINST DEGENERATIVE DISEASES.

All this thanks to the design, Design, manufacturing and sales of in-vitro diagnostic medical devices for the diagnosis, prognosis and follow-up of the treatment of neurological diseases, together with the quantitative analysis of the human Beta-Amyloid in human plasma.

VISION

TO BE YOUR REFERENCE IN RESEARCH AND DEVELOPMENT IN BIOTECHNOLOGY FOR NEUROLOGICAL DISEASES.

STAKEHOLDER APPROACH

WE WORK TOGETHER: Much of the success of our projects depends on our close collaboration with stakeholders..

WE TRY TO MEET YOUR EXPECTATIONS: To do that, we use our experience to anticipate your problems

ADVICE: We have extensive advice and the possibility of training to ensure the correct use of our products and services.

QUALITY
+
MANAGEMENT
= SUCCESS

The management of our processes, interrelated as an optimized integral system, allows us to establish the processes to achieve our objectives.

We maintain an active and dynamic Quality Management System that ensure a continuous improvement.

OUR PRODUCTS ARE SAFE AND EFFECTIVE

A thorough risk management policy for products and processes, complying with applicable standards and regulatory requirements including conformity assessment procedures and modification management, as well as the general safety and performance requirements and internal requirements, and those of our stakeholders.

We are cautious in its indication trying to identify, evaluate, reduce and keep under control any possible risk that may be associated.

WE IMPROVE WHEN NECESSARY

Continuous self-criticism for the technical and regulatory adaptation of the system to adapt the changes in society, the market and regulatory changes.

Continuous improvement of processes to maintain a flexible production capable of adapting to regulatory requirements and those of our stakeholders.

WE WORK AS A TEAM

We want to have a work environment in which the dialogue and the cooperation are the tools of progress.

We are a human team in which everyone collaborate for mutual benefit. Each one is the responsible for the function they perform but with a close relationship with the rest of the team.

The recipient of an internal work process will be treated as a client in the same way as the recipient of a process external to the company.

LEADERSHIP: QUALITY IS EVERYONE'S COMMITMENT

Management guides and involves everyone, acting as the main DRIVER in achieving quality objectives since it considers that quality is an essential factor for the success of our company. That is why we have the total commitment of Management with quality objectives.

Decision making is based on the feedback between our processes, stated objectives and the mission of the company.

Management carries out an annual review of the company's context and the needs and expectations of stakeholders, as well as the risks and opportunities to determine the current situation of the company, using markers that are reviewed with appropriate frequencies to correct possible deviations with advance.

DECISIONS BASED ON DATA

A VALUE CHAIN

We have a work system in which we have identified the processes that create value. All work processes of each member of the team generate added value for the work of the rest. The company guarantees the awareness and competence of the personnel through the necessary training actions.

WIN-TO-WIN RELATIONSHIPS

We maximize our effectiveness and create value by having a wide network of contacts and external collaborations always observing the maximum professionalism. We maintain a close relationship with our network and collaborators that allow us mutual benefit.
